Services

Mitsubishi Electric Living Environment Systems is a market leader in providing solutions to cool, heat, ventilate and control our buildings.

As a major manufacturer of some of these pivotal technologies, we hold the UK's energy challenges close to our heart. We want to help the nation achieve its climate goals; we want to help individuals and businesses reduce the energy consumption of their buildings, whilst also helping to reduce their annual running costs.

Founded in 1921, with many of those years spent at the forefront of the air conditioning industry, we have led the way in the use of innovative, energy efficient, heat pump technology. Mitsubishi Electric has evolved, and today our areas of expertise go way beyond advanced air conditioning systems that formed the foundation of our business.

Here in the UK, our Living Environment Systems division provides advanced solutions that cool, heat, ventilate and control buildings in the most energy efficient and cost effective ways possible.

With performance and efficiency central to our business, we are leading the way to a more sustainable future through high performance products and controls that maximise comfort, minimise cost and reduce carbon emissions.

Through our technical expertise, long experience and innovative product range, we enable buildings everywhere to significantly improve energy efficiency, reduce running costs and adhere to increasingly tough legislation.

Towards a better use of energy in buildings

A strong commitment to the environment remains a long-term goal of Mitsubishi Electric under its global framework for realising a sustainable planet - Environmental Vision 2021. In the UK, this vision translates into our Green Gateway philosophy which is central to the way we do business. With this initiative, we are seeking to use our position as a manufacturer of key technologies to increase awareness and improve energy use in the built environment.

By constantly challenging everyone involved to combat the issues we all face and encourage constructive dialogue throughout the industry, we aim to help everyone address their energy use and to work towards a more sustainable future.

Working within the construction industry in this way and developing energy efficient cooling, heating and ventilation solutions - all managed by the most advanced control systems available.

At Mitsubishi Electric we believe we can truly make a world of difference.

Energy Efficient Air Conditioning Systems

The need for air conditioning

Today's commercial buildings are increasingly air tight and filled with heat generating office equipment and lighting, which presents a problem for anyone trying to maintain a stable and comfortable internal environment. With buildings accounting for around half of all UK greenhouse emissions, legislation is demanding higher standards of air quality and increased energy efficiency.

To reduce the impact of the built environment, the challenge is to find cooling, heating, ventilation and control solutions that match energy efficiency with complete flexibility of design and control.

Our innovative and pioneering air conditioning systems offer more than double the efficiency levels of 10-15 year old systems and can also be far more efficient than traditional methods of cooling and heating buildings, resulting in reduced running costs and lower carbon emissions.

Todays systems can simultaneously heat and cool different spaces to balance energy use across a building and sanitary hot water can even be supplied from the same system.

Energy Efficient Air Conditioning Systems

The benefits of our air conditioning

As a market leader, we pride ourselves in providing high performance and competitive systems with low running costs.

By utilising heat pump technology, our air conditioning units not only provide cooling, but also heating and often sanitary hot water. Heat pump technology requires only a small amount of electricity to harvest, upgrade and move heat from one location to another and providing heating and hot water as part of an integrated air conditioning system is far more efficient than traditional heating methods such as gas.

Outstanding benefits

- Efficient and extensive product range ideal for a variety of buildings, from small retail outlets, up to vast multi-storey office complexes
- Air conditioning units which can upgrade 'free' energy from a range of natural sources including air, ground and water
- Our pioneering technology has led the way over the last decade with advances in energy efficiency through inverter technology, refrigerant and compressor design and control solutions
- We measure and report true seasonal efficiency to provide accurate performance data
- Dedicated Partner Programme for air conditioning installers
- Reliable technical support and training at every step of the way

M Series

Room Air Conditioning

Air Conditioning | Heating
Ventilation | Controls

The Adaptable M Series Range

Designed to cool or heat small to medium sized spaces, such as retail units and small offices, the M Series splits range provides a versatile, yet affordable air conditioning solution.

Quick to install, the range includes one of the quietest units on the market. Also available in a variety of options, the M Series range fits in wherever its needed. Indoor units can be wall or floor mounted.

Wall Mount Systems

- Cost effective Classic Inverter series
- Inverter series designed to suit popular demand
- Stylish Zen indoor series in black, silver or white
- Top of the range High COP Inverter series

Floor Mount Systems

- Extremely versatile
- Designed for wall installation at floor level
- Compact design makes installation easy
- 3 models available including 2.5kW-5.0kW

Operational Range

Operation range	MUZ-DM	MUZ-SF/GF/FH/EF MUFZ-KJ
Cooling	-10°C to +46°C	-10°C to +46°C
Heating	-10°C to +24°C	-15°C to +24°C

Nominal Conditions: Cooling; indoor 27°C DB, 19°C WB; outdoor 35°C DB, 24°C WB.

Nominal Conditions: Heating; indoor 20°C DB; outdoor 7°C DB, 6°C WB.

UK Conditions: Summer; indoor 21°C DB, 15°C WB; outdoor 27°C DB.

UK Conditions: Winter; indoor 21°C DB; outdoor 0°C DB, -1°C WB.

MAC-333IF	Interface for group control, run fault and connection to M-NET System	£121
MAC-397IF	Interface for Contact Terminal and PAR-32MAA / PAC-YT52CRA Wired Remote Controller	£54
MAC-557IF	Interface for connection to WiFi MELCloud service	£72
PAC-YT52CRA	Simplified wired remote controller	£111
IO INTERFACE	Input/output interface	£173
MELCOBEMS MINI	Modbus/BACnet interface	£101

The Renewable Solutions Provider
Making a World of Difference

Mr Slim

Packaged Split-System
Air Conditioning

Air Conditioning | Heating
Ventilation | Controls

The Versatile Mr Slim Range

Suitable to cool or heat a huge variety of applications such as offices and retail units, our Mr Slim range is one of Britain's best selling air conditioning split-systems. Combine the efficiency with the complete versatility that this range has to offer and the possibilities are virtually infinite.

Inverter

- Cost effective
- Available in single and three phase outdoor units
- Available with four way blow cassettes from 7-14kW

Standard Inverter

- High quality cost effective Standard Inverter
- Available in single and three phase outdoor units
- S Series models from 2.5kW-7kW available with four way blow cassettes, ducted or ceiling mounted indoor units
- Standard Inverter models from 10kW-22kW available with four way blow cassettes, ducted, floor, wall or ceiling mounted indoor units

Power Inverter

- Top of the range Power Inverter technology optimised for high seasonal efficiencies
- Available in single and three phase outdoor units
- 9 models available from 3.5kW-22kW
- Available with four way blow cassettes, ducted, floor, wall or ceiling mounted indoor units

Zubadan Inverter

- Optimal performance at low ambient temperature conditions
- Quicker defrost and improved start up in heating*
- Available in single and three phase outdoor units
- 2 models available from 10kW-12.5kW
- Available with four way blow cassettes, wall or ceiling mounted indoor units

* Will work effectively even when the outdoor ambient air temperature is -25°C. At -20°C, max heating capacity is achieved in about 20 mins.

Operational Range

Operation range	Size	PUHZ-ZRP	PUHZ-P / PUHZ-SP	PUHZ-SHW	SUZ-KA / SUZ-SA
Cooling	Less than 50	-15°C to +46°C	-15°C to +46°C	-15°C to +46°C	-10°C to +46°C
	50	-15°C to +46°C	-15°C to +46°C	-15°C to +46°C	-15°C to +46°C
	60 or more	-15°C to +46°C	-15°C to +46°C	-15°C to +46°C	-15°C to +46°C
Heating	Less than 50	-11°C to +21°C	-15°C to +21°C	-25°C to +21°C	-10°C to +24°C
	60 or more	-20°C to +21°C	-15°C to +21°C	-25°C to +21°C	-10°C to +24°C

Nominal Conditions: Cooling; indoor 27°C DB, 19°C WB; outdoor 35°C DB, 24°C WB.

Nominal Conditions: Heating; indoor 20°C DB; outdoor 7°C DB, 6°C WB.

UK Conditions: Summer; indoor 21°C DB, 15°C WB; outdoor 27°C DB.

UK Conditions: Winter; indoor 21°C DB; outdoor 0°C DB, -1°C WB.

The Flexible & Efficient

Multi-Split Range

Ideal for shops and small commercial buildings that require air conditioning in more than one room, the Mitsubishi Electric Multi-Split systems combine flexibility and performance while lowering CO₂ emissions and running costs.

Using R410A refrigerant and flexible enough to suit a number of applications, the range includes models that will run up to six indoor units per single outdoor unit, between 5.3 and 12.2kW. With vastly reduced power consumption, inverter technology and with increased pipe length and advanced controls, the Multi-Split range is extremely efficient and versatile, helping to make system application easier. A variety of indoor units can be connected to a single outdoor unit, these include cassettes, ducted, wall, floor or ceiling mounted. The range is one of the most efficient in the industry with energy efficiency class up to A++.

► Example of a 6-way
Multi-Split System

Operational Range

Operation range	MXZ
Cooling	-10°C to +46°C
Heating	-15°C to +24°C

Nominal Conditions: Cooling; indoor 27°C DB, 19°C WB; outdoor 35°C DB, 24°C WB.
Nominal Conditions: Heating; indoor 20°C DB; outdoor 7°C DB, 6°C WB.
UK Conditions: Summer; indoor 21°C DB, 15°C WB; outdoor 27°C DB.
UK Conditions: Winter; indoor 21°C DB; outdoor 0°C DB, -1°C WB.

Multi Split models with eight ports, 14 and 15.5 kW can now be found in Y Series (4.5-8hp) City Multi section.

Notes:

* Combined max running current of all indoors on system must not exceed 3A if PEAD-RP is used.

² System COP / EER when connected to MSZ-EF x indoor unit connections.

³ The SEZ-KD25/35VAQ cannot be used when the total indoor capacity is equal to the outdoor capacity i.e. when the capacity ratio is 1.

The Energy Efficient City Multi VRF Range

The City Multi range is Mitsubishi Electric's answer to large scale VRF (Variable Refrigerant Flow) applications. The technology of City Multi is second to none and offers excellent seasonal energy efficiency, low running costs and reduced CO₂ emissions.

Suitable for medium to large buildings that demand high performance with optimum efficiency, our City Multi VRF range can run numerous indoor units connected to one outdoor unit.

VRF Systems

Our **City Multi VRF Systems** offer both heat pump and heat recovery technology. Heat pump systems deliver cooling or heating to a space, whereas heat recovery systems can simultaneously provide cooling and heating at the same time via separate indoor units, moving energy around a building for maximum efficiency.

The City Multi Y Series heat pump system offers a simple and flexible solution where there is a demand for a changeover capability between heating and cooling for all indoor units, helping to ensure a constant and comfortable indoor climate. The City Multi R2 heat recovery system can provide simultaneous heating and cooling through only two pipes rather than the conventional three which are traditionally used on heat recovery systems, typically reducing installation time and material costs. Recovered energy can not only be moved around rooms within a building but can also be upgraded to heat water for sanitary use.

By transferring wasted heat in this way, substantial savings can be made on annual running costs and CO₂ emissions. With a range of over 80 indoor units of varying capacity including floor standing, ducted, ceiling cassettes, ceiling suspended and wall mounted types, up to 50 indoor units can be connected to one City Multi outdoor unit.

The Energy Efficient City Multi VRF Range

£9,114

£10,376

PIPING RESTRICTIONS	PFD-P-VM-E
TOTAL PIPING LENGTH	165m max
BETWEEN INDOOR AND OUTDOOR UNITS - HEIGHT	50m max (40m max if outdoor installed below)

Notes: *1 2 x PUHY-P250YJM-A units are needed when connected to a PFD-P500VM-E.

*2 PFD-P500VM-E uses two refrigerant circuits. Pipe sizes are per single refrigerant circuit.

PRICE		£1,723	£2,417

Notes: The figures in () indicates the heat recovery at Lossnay core. Total value is capacity of Lossnay core and refrigerant coil. The current and input are based on the above air volume.
The sound pressure at the air outlets (45° angle 1.5m ahead) is about 6dB greater than the indicated value. (High notch). Specifications may be subject to change without notice.

The Innovative Heating Only Solutions

With legislation changing and increasing pressure to replace traditional heating systems with renewable sources of heat, the industry needs to be able to provide a wide range of innovative solutions.

Building on a comprehensive range of heating products, City Multi 'Heating Only' systems offer a cost effective and efficient solution designed to combat challenging legislation and the need to reduce carbon emissions and running costs.

Designed to deliver heat via the air, our full range of air conditioning products can also be adapted with the use of intelligent controls to run as Heating Only products.

Why Heating Only

Heat Pumps have been developed over the years to enable heating and cooling from one machine, but there are many reasons to use these energy efficient products to provide only heating to a building via the delivery method of air.

- Many buildings do not need cooling, for example schools and student accommodation
- Heat pump air conditioning systems offer a simple, flexible and efficient method of delivering heat to a building
- Help with Part L Compliance by removing all power consumption related to cooling

MELCloud is a Cloud based solution for controlling your Mitsubishi Electric Ecodan systems either locally or remotely by PC, Mac, Tablet or Smartphone via the Internet.

Increasing energy bills, the need to reduce carbon emissions and the raft of challenging legislation are driving the demand for alternative forms of heating to improve energy efficiency.

As a market leader in both commercial and domestic renewable solutions, Mitsubishi Electric is a pioneer in the development of heat pump technology. Heat pumps have been used around the world for decades and Mitsubishi Electric has refined this technology to produce Ecodan - one of the most advanced, efficient heating systems available today.

The award winning Ecodan heat pump range is suitable for both small and large projects and delivers effective, low carbon heating and hot water. Ecodan heat pumps provide a simple, renewable solution that rivals traditional heating systems.

- Helps achieve renewable energy targets
- Capable of reducing running costs and CO₂ emissions
- Easy to design, install and maintain
- Fully scalable and can work independently or in conjunction with other systems
- Optimised systems from 4kW to 960kW
- MCS approved

From small flats to large detached houses, office blocks, schools and community heating schemes, Ecodan is the ideal choice to provide reliable space heating and hot water all year round.

Energy Monitoring Packs

PRICE	
ENERGY MONITORING PACK ONE (EMP1)	
EMP1 is inbuilt energy monitoring and is included with every Flow Temperature Control 5 (FTC5) system free of charge. The system displays consumed and produced energy to the nearest kWh.	£ -
Optional Wi-Fi interface for use with MELCloud (PAC-WF010-E)	
£72	
ENERGY MONITORING PACK TWO (EMP2)	
EMP2 increases energy consumption accuracy and includes two Measuring Instrument Directive approved electric meters. EMP2 interfaces with FTC5 and records and measures to 1 pulse per watt hour, ensuring accurate energy consumption figures.	£72
Optional Wi-Fi interface for use with MELCloud (PAC-WF010-E)	
£72	
ENERGY MONITORING PACK THREE-MONOBLOC (EMP3-M) MMSP COMPLIANT	
EMP3-M for Ecodan monobloc systems contains the two electric meters from EMP2, a Measuring Instrument Directive approved heat meter with resolution to 1 Wh, a MELCloud Wi-Fi interface and 1 years rolling data storage. This pack complies to the DECC metering and monitoring service pack criteria required for the additional domestic RHI payments.	£697
ENERGY MONITORING PACK THREE-MONOBLOC (EMP3-M-3ph) MMSP COMPLIANT	
EMP3-M-3ph for Ecodan monobloc systems contains the two electric meters (1 x single phase and 1 x 3 phase electric meters), a Measuring Instrument Directive approved heat meter with resolution to 1 Wh, a MELCloud Wi-Fi interface and 1 years rolling data storage. This pack complies to the DECC metering and monitoring service pack criteria required for the additional domestic RHI payments.	£777

Energy Monitoring Packs

ENERGY MONITORING PACK THREE-SPLIT (EMP3-S) MMSP COMPLIANT	PRICE
EMP3-S for Ecodan split systems contains the two electric meters from EMP2, a Measuring Instrument Directive approved heat meter with resolution to 1 Wh, a MELCloud Wi-Fi interface and 1 years rolling data storage. This pack complies to the DECC metering and monitoring service pack criteria required for the additional domestic RHI payments.	£697

ENERGY MONITORING PACK HYBRID-MONOBLLOC (EMPH-M)	PRICE
EMPH-M for Ecodan monobloc systems includes a Measuring Instrument Directive approved heat meter with resolution to 1 kWh that is required for hybrid systems claiming domestic RHI.	£319
Single phase electric meter / 3 phase electric meter	£36 / £116
Optional Wi-Fi interface for use with MELCloud (PAC-WF010-E)	£72

ENERGY MONITORING PACK HYBRID-SPLIT (EMPH-S)	PRICE
EMPH-S for split systems includes a Measuring Instrument Directive approved heat meter with resolution to 1 kWh that is required for hybrid systems claiming domestic RHI.	£319
Single phase electric meter / 3 phase electric meter	£36 / £116
Optional Wi-Fi interface for use with MELCloud (PAC-WF010-E)	£72

Ventilation

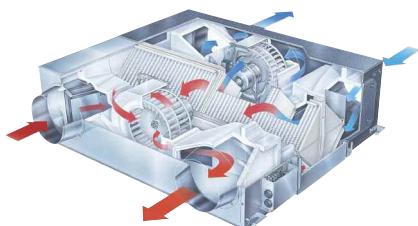

Air Conditioning | Heating
Ventilation | Controls

Fresh Air Ventilation Range

Why Do We Need Fresh Air Ventilation?

Poor indoor air quality can be attributed to many problems inside a building. Excess humidity causes dampness, rot and mould, whilst pollutants are known to be a major cause of damaging health issues such as asthma and eczema. Stale air is also believed to lead to a loss in productivity and low morale.

As the demand for improved energy efficiency results in increasingly airtight buildings, natural ventilation proves less effective and drives the need for mechanical ventilation. With increasing legislation, the challenge for designers, installers and occupiers of any building is to find ventilation that's both effective and energy efficient.

Mitsubishi Electric meets this need with a range of ventilation products covering mechanical ventilation with heat recovery units (MVHR). These systems have been designed to deliver a fresh air supply to a building whilst simultaneously extracting stale air in the most energy efficient manner possible by utilising heat recovery technology.

Benefits include:

- Clean, fresh air
- Improved air quality and comfort
- Increased climate control
- Energy efficient heat recovery
- Reduced energy bills

The Renewable Solutions Provider
Making a World of Difference

Controls

Air Conditioning | Heating
Ventilation | Controls

The Importance of Controls

The need for control is paramount in order to optimise the performance of any air conditioning, heating or ventilation system and minimise its running costs and the emissions generated. Mitsubishi Electric offer a wide range of control options designed to do just this.

Operating an air conditioning, heating or ventilation system without the right control can prove costly. It's therefore important to ensure that every system is correctly specified and integrated within the building to the degree of control it requires. Mitsubishi Electric have a wide range of controls available 'off-the-shelf' and where needed, individual control systems can be specifically designed to suit.

Good controls will benefit any application, large or small. Our range of products need to react to a variety of factors: different room sizes, usage and customer levels, changes in the climate, electronic equipment and lighting etc.

The ability to monitor the energy consumption and operation of systems is also vital. It is often said that you cannot manage what you are not measuring. Our control systems will enable simple measuring and monitoring of energy consumption and running costs to ensure operation is maintained.

So whatever the application, optimum control of our systems is essential and will result in a constant, comfortable environment, which in turn is both energy and cost efficient.

A Degree of Difference

When an air conditioning, heating or ventilation system is not properly controlled, it will not run as efficiently as it should. For every degree that the system deviates from the required temperature, energy costs can rise by up to 5%. Specify one of the many control options from Mitsubishi Electric to ensure our products work as intended, whilst giving the optimum amount of control.

Services and Support

at every step of the way

Contents

At Mitsubishi Electric, not only have we developed an innovative range of air conditioning, heating, ventilation and control solutions, we have also examined how we support the market throughout the complete lifecycle of our products - literally from cradle to grave.

Whether in pre-sales design and specification, installation and maintenance support, right through to our free recycling programme, we can offer solutions that deliver the quality and excellence you would expect to help make a world of difference.

MELSMART
TECHNICAL SERVICES

MELSmart Technical Services

Advanced, reliable technical support at every step of the way

Meeting today's energy challenges for our commercial premises demands more integrated thinking from everyone involved in the design, supply, installation, commissioning and maintenance of essential building services - whether it is for an individual property or a national estate.

Ever increasing energy bills, the need to reduce carbon emissions and a raft of challenging legislation are driving the demand for increased energy efficiency and control in the cooling, heating, ventilation and associated technologies that we use.

As a manufacturer, we realise that product development alone is not enough.

To keep our products working at their optimum, we have developed the MELSmart approach to ensure our customers are able to maximise the energy efficiency of their building's services right from the start.

MELSmart offers a range of support that includes:

- Fault Finding
- Commissioning
- Spare Parts & Warranty
- Chiller Replacement Surveys
- CPD Accredited Technical Product Training
- System Health Checks
- Maintenance
- R22 Audit Surveys
- 24/7/365 Technical Help Desk

Whatever the challenge, we're here to help you meet it.

MELSmart Contact Details:

Telephone: 0161 866 6089

Option 1 - Air Conditioning Technical

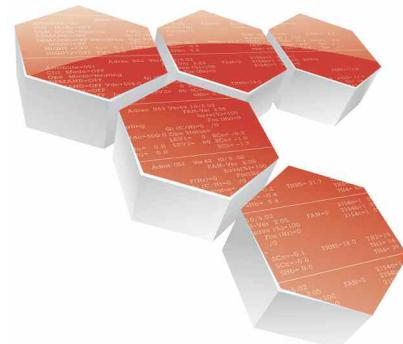

Option 2 - Spares

Option 3 - Warranty

Option 4 - Heating Technical

Option 5 - Returns

Option 6 - Product Training and Site Services

Product Training

Mitsubishi Electric has six state-of-the-art training suites based at Hatfield, Birmingham, Bristol, Manchester, Scotland and Reigate for your convenience. Providing product training for all levels of expertise, our courses are taught by experienced engineers, with a wealth of knowledge and are all CPD accredited.

For bookings please telephone 0161 866 6089 (Option 6, Option 1)

Commissioning Assistance

Prior to operation, the MELSmart team ensures that the installation is checked against design specification. Trained technicians ensure that the system is fully operational, and that performance and energy efficiency is maximised.

We then confirm whether or not the system is operating within its design parameters and validate any warranties. All on-site equipment is then added to our database where a constant record will be kept of any activities between the site and Mitsubishi Electric. On completion, we will provide a Commissioning Log Book with an accurate operating record of the working system.

Type of Visit	PRICE
Fault Diagnostic Site Visit	£585 per day
Commissioning (as per commissioning check list) VRF/HVRF	£585 per day
Commissioning Chillers & Heat Pump Water Products	P.O.A.
Maintenance on our water products	Survey required
City Multi Strip Down	See next page
Controls Commissioning	£585 per day
Health Checks	£585 for up to 4 systems

For Controls Commissioning, forms will need to be completed prior to the site visit. Please contact: 0161 866 6089 (Option 6, Option 2)

Design	PRICE
Post-Installation Appraisal / Evaluation	£585 per day

City Multi / Chiller Stripdown

Partner Programme

Mitsubishi Electric Partner Programme

The Mitsubishi Electric Partner Programme is inclusive and open to all qualifying air conditioning and heating installation companies, large or small.

Using the world-renowned Mitsubishi Electric brand, we will train, facilitate and promote all qualifying companies as part of our aim to drive the industry forwards. Mitsubishi Electric recognises the importance of forging lasting relationships with professional companies who install our equipment. Our Partner Programme enables us to do just that.

Established since 2005 and designed to raise industry standards, our Partner Programme assures end users of a consistently high level of installation and after sales service that supports our systems. To be eligible to join our scheme in the first instance, prospective installation partners must comply with the necessary building regulations and meet specific industry, programme and CSR standards.

All partners are reviewed on a regular basis to ensure they continue to meet the required standards that makes them eligible to be part of the Mitsubishi Electric Partner Programme.

How to apply for the Partner Programme

Speak to your Mitsubishi Electric Representative or email partner@meuk.mee.com

Partner Programme Benefits

Dedicated Partner Programme Co-ordinator

Our dedicated Partner Programme Co-ordinators are on hand to give Partners the support they need.

Joint Marketing / Relationship Development Fund (RDF)

We will work with Partners to promote our relationship and generate awareness of the unique business benefits of the Partner Programme to end-users. We operate a Partner Programme Relationship Development Fund (RDF) allocated in relation to their commercial activities with Mitsubishi Electric.

Promotional Goods RDF Catalogue

Partners can take advantage of their RDF to enhance their company image with dual branded work wear, promotional items and golf accessories.

Product and Industry Training

Although our Partners receive a free allocation of training courses, additional courses can be funded from the Relationship Development Fund at no further cost to the Partner.

24hr Technical Support

To assist our Partners in the maintenance of our equipment we have a dedicated technical support team who will endeavour to speedily diagnose faults and offer solutions to the problems our Partners may encounter.

Extended Warranty

We will offer all Partners who adhere to our standards exclusive extended product warranties.

Sales Leads

We will make sales leads available exclusively to our Partners.

Business Support Tools

We have made it easier to do business with Mitsubishi Electric through the introduction of new technologies and our business tools available to Partners.

Factory Visits & Events

Our Partners and their clients will have the opportunity to witness first-hand the manufacture of air conditioning and Ecodan units at our manufacturing facility in Scotland.

Services and Support

at every step of the way

Design and Consulting Services

As part of the Mitsubishi Electric commitment to supporting robust application of our leading technologies, a team of Consultant Sales professionals work nationally with mechanical building services specifiers and consultants to achieve early engagement in project design.

Clients are able to confidently apply cooling, heating, ventilation and controls within their individual projects with the emphasis on a solution-based philosophy to support 'as-designed' performance and efficiencies.

This approach helps projects realise 'as-specified' performance and efficiency levels - all designed to achieve the most efficient and cost-effective outcome for the building operator, whilst reducing the overall environmental impact.

As initial designs move from the drawing board through planning, procurement, installation and commissioning, to on-going operation and use, we work closely with our customers to balance capital expenditure, system efficiencies, installation costs, control strategies and running costs.

Working in the real world

Recognising the commercial and delivery pressures of projects in the real world Mitsubishi Electric has in place a number of technically biased Business Development Managers.

Our team support the M&E roll out and tackle the challenges associated with change of building use or layout (design evolution) from original design and to support robust value engineering that does not compromise the original design or performance criteria.

We understand the link between effective design and achieving the best outcomes for built environment owners, operators and users. The goal of our team is therefore to ensure robust design and to support an equally robust implementation.

Getting the right balance between capital cost, system efficiencies, installation costs, control systems and ultimately operating costs all need to be considered at an early stage to ensure a positive outcome.

Framing and enabling the market-leading service we offer our clients is the on-going professional and personal development of our employees to meet ever increasing customer needs in product knowledge, industry practice and legislation.

Mitsubishi Electric MELFinance Solutions

We developed MELFinance Solutions to respond to current market conditions and the need for customers to manage cash flow, while benefitting from the installation of leading technology to reduce carbon emissions and operational costs.

MELFinance Solutions can help end user customers fund the cost of new equipment and its installation via hire-purchase finance. Put simply, this means that (subject to financial status), an end-user customer can repay the combination of 'fixed asset' and maintenance costs over an agreed period of between 1 to 5 years. For qualifying companies, it is a flexible alternative to a traditional bank loan that provides significant cash flow and tax benefits:

- **No need for hefty deposits**

Finance deals are secured wholly or largely on the heating, cooling and/or ventilation equipment being financed

- **Stronger cash flow**

Releases tied-up cash and preserves other forms of credit for other business or operational needs

- **Fixed, regular payments**

Helps you plan for the future by eliminating uncertainty and costly surprises

- **Quick decisions**

We always aim to provide a prompt turnaround for funding applications

- **Immediate payment**

Settlement of the full installation and equipment invoice upon installation/delivery

The five-year, "trouble-free" cooling, heating and ventilation finance package offers a host of advantages integrating on-site installation and commissioning fees, minimum three-year warranty on all Mitsubishi Electric equipment, scheduled maintenance visits and 24/7 emergency technical helpline for any on-site issues.

To get your no obligation finance proposal visit: www.MELFinanceSolutions.co.uk
or email MELFinanceSolutions@meuk.mee.com

Mitsubishi Electric Europe B.V. holds a Consumer Credit Licence no. 0655891 for credit brokerage. As from 1 April 2014: Authorised and regulated by the Financial Conduct Authority as a credit broker.
Hire-purchase finance will be considered subject to status by an independent finance house as facilitated by Mitsubishi Electric. Finance house's terms and conditions apply. This website text does not constitute an offer to supply goods/services or provide or arrange hire-purchase finance. Finance only available where you enter into Mitsubishi Electric's contract package for removal of any existing installation, design, supply and commissioning services. Package is conditional on you entering into (i) a maintenance contract for the installation and (ii) a hire-purchase agreement with Mitsubishi Electric's finance partner. Otherwise, all goods are supplied subject to Company's General Terms and Conditions of sale, copy available upon request.

Delivery Guidelines

Mitsubishi Electric Deliveries

At Mitsubishi Electric, we take our delivery programme very seriously because we realise that our customers' businesses can depend on getting the right equipment on site at the right time.

That's why we have developed a comprehensive and flexible delivery programme with one of the longest delivery windows in the industry.

With the ability to offer timed, weekend and Public Holiday deliveries, coupled with free 'Text Ahead' and 'Ring Ahead' functions, we aim to keep our customers informed every step of the way.

Delivery Notes

- Cut off for next day deliveries is 2.30pm on the working day prior to delivery
- Standard delivery is between 8.00am and 5.30pm
- AM / PM / Timed / Weekend / Public Holiday deliveries are all available (additional notice needed and charges will apply
 - please refer to full delivery guidelines for further details)
- Standard delivery will normally be made on an 18T rigid lorry equipped with a tail lift and a single driver with a pump truck
- Other vehicle types will be utilised dependant on any site access issues and delivery size
- If there are access restrictions at your nominated delivery point and a vehicle other than an 18T lorry is required, this will need to be booked in advance and a charge may apply
- Our 'Text Ahead' and 'Ring Ahead' functions are available on all deliveries with the exception of parcel providers, which will offer 'Text Ahead' only
- Deliveries available via HIAB (Flatbed vehicle with crane) / with chapter 8 signage - require 48 hours' notice and extra charges may apply
- We offer a 2-man delivery service, removal of packaging and a stair walker - these require 48 hours' notice and extra charges will apply
- Mitsubishi Electric is an Associate Member of the Fleet Operator Recognition Scheme (FORS) and all of our vehicles are FORS accredited to Bronze level
- Collection is also available from our Milton Keynes warehouse - these must be pre-arranged and require at least 3 hours' notice
- Returns to be notified within 15 working days - Terms and Conditions apply

Mitsubishi Electric Guide to
Building Information Modelling

Information Guide | 45

CPD Information Guides

Mitsubishi Electric is accredited by the Construction CPD Certification Service in many different areas.

We have produced a number of Industry Information Guides that are available to download from our document library.
We also run a number of CPD seminars and training courses across the UK.

To find out more, simply contact your local Mitsubishi Electric sales office.

Mitsubishi Electric Website and Document Library

Website

For further information on any of our products and services please visit our website,
livingenvironmentalsystems.mitsubishielectric.co.uk which has been designed to provide
a detailed overview of the energy saving solutions we can provide you.

The smart, clean and modern design of the site focuses on the features and benefits that Mitsubishi Electric equipment has to offer and hosts our Air Conditioning, Heating, Corporate Solutions and Green Gateway websites under one umbrella, making it easy for visitors to navigate between them. The websites not only promote our comprehensive product offerings but have also been designed to inform and educate visitors, with pages dedicated to the very latest legislative challenges that face all those involved in the built environment.

Document Library

Our website: library.mitsubishielectric.co.uk also includes a comprehensive Document Library which features all current operating and installation manuals, as well as product literature, CPD guides and more.

This means there is no longer a requirement for visitors to login to our sites to download the latest product and technical information. To add to this, a document library app is also available allowing visitors to access this information simply from their tablet or smart phone.
