

Air to Water Heat Pump PUZ-HWM140HA series

INSTALLATION MANUAL

For a fe and o ret ue , read this manual and the indoor unit installation manual thoroughly before installing the outdoor unit. English is original. The other languages versions are translation of the original.

INSTALLATIONSHANDBUCH

Aus Sib erheit ründen und z rrib tigen Verwendung v r der Installation der Außenanlage das v rliegende Handbuch und die Installationseleitung der Innenanlage gründlich durch lern n. Das Original ist in Englisch . Die anderen Sprachen sind v m Original übere tz .

MANUEL D'INSTALLATION

Avant d'installer l'appareil extérieur, lire attentivement le manuel, ainsi que le manuel d'installation de l'appareil intérieur pour une utilisation à ce titre et à cet effet. L'anglais est l'original. Les versions fournies dans d'autres langues sont des traductions de l'original.

INSTALLATIEHANDLEIDING

Lees v o een v ilig en juist gebruik deze handleiding en de installatiehandleiding in het binnenapparaat v rugtig door v ordat u met het installeren in het buitenapparaat begint. Het Engels is het origineel. De andere talen zijn vertalingen in het origineel.

MANUAL DE INSTALACIÓN

Para un uso correcto y seguro, lea detalladamente este manual y el manual de instalación de la unidad interior antes de instalar la unidad exterior. El idioma original del documento es el inglés. Las versiones en los demás idiomas son traducciones del original.

MANUALE DI INSTALLAZIONE

Per un uso corretto e sicuro, leggere attentamente il presente manuale ed il manuale di installazione dell'unità interna prima di installare l'unità esterna. Il testo originale è redatto in lingua inglese. Le altre versioni linguistiche rappresentano traduzioni dell'originale.

ΕΓΧΕΙΡΙΔΙΟ ΟΔΗΓΩΝ ΕΓΚΑΤΑΣΤΑΣΗΣ

Για σωστή και ασφαλή χρήση, διαβάστε προσεκτικά αυτό το εγχειρίδιο καθώς και το εγχειρίδιο εγκατάστασης της εσωτερικής μονάδας, προτού εγκαταστήσετε την εξωτερική μονάδα. Η γλώσσα του πρωτοτύπου είναι η αγγλική. Οι εκδόσεις άλλων γλωσσών είναι μεταφράσεις του πρωτοτύπου.

MANUAL DE INSTALAÇÃO

Para uma utilização correcta e segura, leia atentamente este manual e o manual de instalação da unidade interior antes de instalar a unidade exterior. O idioma original é o inglês. As versões em outros idiomas são traduções do idioma original.

INSTALLATIONSMANUAL

Læs af s k r heds eng denne manual om hvordan manuken til installation af indendørs enheden grundigt, før du installerer udendørs enheden. Engelsk er originalpræget. De andre præget versioner er også oversat fra originalen.

INSTALLATIONSANLEITUNG

Läs bruk n v ingen ob inomhusenhets installationshandbok noge innan du installerar utomhusenhet för att röb brecka och undanring. Engelska är originalpräget. De andra präget versionerna är också översättningar av originalen.

INSTALLASJONSHÅNDBOK

For å sikre korrekt og sikker bruk i denne håndboken om hvordan manuken til innendørs enheten løsnes grundig igjennom før enheten installeres. Engelsk er originalpræget. De andre præget versjonene er også oversatt fra originalen.

ASENNUSNUSOPAS

NÁVOD K MONTÁŽI

Kvůli zajištění bezpečného a správného používání si před montáží vnější jednotky pečlivě přečtěte tento návod i návod k montáži vnitřní jednotky. Verze v anglickém je originál. Ostatní jazykové verze jsou překladem originálu.

INSTRUKCJA MONTAŻU

Aby zapewnić bezpieczne i prawidłowe korzystanie z urządzenia, przed montażem jednostki zewnętrznej należy dokładnie zapoznać się z treścią niniejszej instrukcji oraz instrukcją montażu jednostki wewnętrznej. Oryginalną instrukcję sporządzono w języku angielskim. Pozostałe wersje językowe zostały przetłumaczone z oryginału.

РЪКОВОДСТВО ЗА МОНТАЖ

За безопасно и правилно използване, прочетете внимателно това ръководство и ръководството за монтаж на вътрешното тяло, преди да монтирате външното тяло. Версията на английски език е оригинал. Версии на други езици са превод от оригинала.

NÁVOD NA INŠTALÁCIU

V záujime bezpečného a správneho používania si pred inštaláciou exteriérovej jednotky pozorne prečítajte tento návod a návod na inštaláciu interiérovej jednotky. Pôvodným jazykom je angličtina. Ostatné jazykové verzie sú prekladom originálu.

TELEPÍTÉSI KÉZIKÖNYV

A biztonságos és helyes használat érdekében alaposan olvassa el ezt a használati kézikönyvet és a beltéri egység telepítési kézikönyvét a kültéri egység felszerelése előtt. A dokumentum eredeti nyelve az angol. A más nyelvű változatok az angol eredeti fordításai.

NAMESTITVENI PRIROČNIK

Za varno in pravilno uporabo natančno preberite ta navodila za uporabo in namestitveni priročnik za notranjo enoto, preden namestite zunanj enoto. Izvirni jezik je angleščina. Različice v drugih jezikih so prevedi izvirnika.

MANUAL DE INSTALARE

Pentru a utiliza aparatul corect și în siguranță, citiți în întregime acest manual, precum și manualul de instalare al unității interioare înainte de a instala unitatea exterioară. Originalul este în limba engleză. Versiunile în alte limbi reprezintă traducerea originalului.

PAIGALDUSJUHEND

Ohutu ja õige s tue tagamise k lugege e s e juhend ja s e adme paigaldusuhend enne s lie adme paigaldamist pöhjaliik. It läbi. Originaal on inglise k eles. Teit es k eltes v ronid on originaali tõlde.

MONTĀŽAS ROKASGRĀMATA

Lai nodrošinātu pareizu un drošu iekārtas lietošanu, pirms iekārtas uzstādīšanas rūpīgi izlasiet šo rokasgrāmatu un iekārtas montāžas rokasgrāmatu. Dokumenta oriģināls ir angļu valodā. Pārējo valodu versijas ir oriģināla tulkojumi.

MONTAVIMO VADOVAS

Kad saugiai ir tinkamai naudotumėte, prieš montuodami lauko įrenginį perskaitykite šį vadovą ir vidinio įrenginio montavimo vadovą. Anglų yra originali kalba. Kitų kalbų versijos yra originalios kalbos vertimai.

PRIRUČNIK ZA POSTAVLJANJE

Radi sigurne i pravilne uporabe pročitajte pažljivo ovaj priručnik i priručnik za postavljanje unutarnje jedinice prije postavljanja vanjske jedinice. Izvorni tekst je engleskom jeziku. Ostale jezične varijante predstavljaju prijevod tog teksta.

UPUTSTVO ZA UGRADNJU

Radi bezbedne i ispravne upotrebe, detaljno pročitajte ovo uputstvo i uputstvo za ugradnju unutrašnje jedinice pre nego što ugradite spoljnju jedinicu. Engleski je original. Verž je na drugim jezicima preveden originala.

Note: This symbol mark is for EU countries only.

This symbol mark is according to the directive 2012/19/EU Article 14 Information for users and Annex IX.

Your MITSUBISHI ELECTRIC product is designed and manufactured with high quality materials and components which can be recycled and reused. This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please, dispose of this equipment at your local community waste collection point.

In the European Union there are separate collection systems for used electrical and electronic products.

Please, help us to observe the environment we live in!

en

⚠ Caution:

- Do not vent R32 into the Atmosphere:

1. Safety precautions

- ▶ Before installing the unit, make sure you read all the "Safety precautions".
- ▶ Please report to or take consent by the supply authority before connection to the system.
- ▶ Equipment complying with IEC/EN 61000-3-12
(PUZ-HWM140VHA)

After installation work has been completed, explain the "Safety Precautions" user and maintenance of the unit to the customer according to the information in the Operation Manual and perform the test run to ensure normal operation. Both the Installation Manual and Operation Manual must be given to the user for keeping. These manuals must be passed on to subsequent users.

接地 (Grounding): Indicates a part which must be grounded.

⚠ Warning:

Describes precautions that must be observed to prevent danger of injury or death to the user.

⚠ Caution:

Describes precautions that must be observed to prevent damage to the unit.

MEANINGS OF SYMBOLS DISPLAYED ON THE UNIT

	WARNING (Risk of fire)	This mark is for R32 refrigerant only. Refrigerant type is written on nameplate of outdoor unit. In case that refrigerant type is R32, this unit uses a flammable refrigerant. If refrigerant leaks and comes in contact with fire or heating part, it will create harmful gas and there is risk of fire.
	Read the OPERATION MANUAL carefully before operation.	
	Servicing personnel are required to carefully read the OPERATION MANUAL and INSTALLATION MANUAL before operation.	
	Further information is available in the OPERATION MANUAL, INSTALLATION MANUAL, and the like.	

⚠ Warning:

- The unit must not be installed by the user. Ask a dealer or an authorized technician to install the unit. If the unit is installed incorrectly, water leakage, electric shock, or fire may result.
- For installation work, follow the instructions in the Installation Manual and use tools and pipe components specifically made for use with R32 refrigerant. The R32 refrigerant in the HFC system is pressurized 1.6 times the pressure of usual refrigerants. If pipe components not designed for R32 refrigerant are used and the unit is not installed correctly, the pipes may burst and cause damage or injuries. In addition, water leakage, electric shock, or fire may result.
- When installing the unit, use appropriate protective equipment and tools for safety.
Failure to do so could cause injuries.
- The unit must be installed according to the instructions in order to minimize the risk of damage from earthquakes, typhoons, or strong winds. An incorrectly installed unit may fall down and cause damage or injuries.
- The unit must be securely installed on a structure that can sustain its weight. If the unit is mounted on an unstable structure, it may fall down and cause damage or injuries.
- If the outdoor unit is installed in a small room, measures must be taken to prevent the refrigerant concentration in the room from exceeding the safety limit in the event of refrigerant leakage. Consult a dealer regarding the appropriate measures to prevent the allowable concentration from being exceeded. Should the refrigerant leak and cause the concentration limit to be exceeded, hazards due to lack of oxygen in the room may result.
- Ventilate the room if refrigerant leaks during operation. If refrigerant comes into contact with a flame, poisonous gases will be released.
- All electric work must be performed by a qualified technician according to local regulations and the instructions given in this manual. The units must be powered by dedicated power lines and the correct voltage and circuit breakers must be used. Power lines with insufficient capacity or incorrect electrical work may result in electric shock or fire.

- This appliance is intended to be used by expert or trained users in shops, in light industry and on farms, or for commercial use by lay persons.
- Use only specified cables for wiring. The wiring connections must be made securely with no tension applied on the terminal connections. Also, never splice the cables for wiring (unless otherwise indicated in this document). Failure to observe these instructions may result in overheating or a fire.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid hazard.
- The appliance shall be installed in accordance with national wiring regulations.
- The terminal block cover panel of the outdoor unit must be firmly attached. If the cover panel is mounted incorrectly and dust and moisture enter the unit, electric shock or fire may result.
- When installing or relocating, or servicing the outdoor unit, use only the specified refrigerant (R32) to charge the refrigerant lines. Do not mix it with any other refrigerant and do not allow air to remain in the lines. If air is mixed with the refrigerant, then it can be the cause of abnormal high pressure in the refrigerant line, and may result in an explosion and other hazards.
- The use of any refrigerant other than that specified for the system will cause mechanical failure or system malfunction or unit breakdown. In the worst case, this could lead to a serious impediment to securing product safety.
- Use only authorized accessories and ask a dealer or an authorized technician to install them. If accessories are incorrectly installed, water leakage, electric shock, or fire may result.
- Do not alter the unit. Consult a dealer for repairs. If alterations or repairs are not performed correctly, water leakage, electric shock, or fire may result.
- The user should never attempt to repair the unit or transfer it to another location. If the unit is installed incorrectly, water leakage, electric shock, or fire may result. If the outdoor unit must be repaired or moved, ask a dealer or an authorized technician.

1. Safety precautions

- After installation has been completed, check for refrigerant leaks. If refrigerant leaks into the room and comes into contact with the flame of a heater or portable cooking range, poisonous gases will be released.
- Do not use means to accelerate the defrosting process or to clean, other than those recommended by the manufacturer.
- The appliance shall be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).
- Do not pierce or burn.
- Be aware that refrigerants may not contain an odour.
- Compliance with national gas regulations shall be observed.
- Keep any required ventilation openings clear of obstruction.
- Do not use low temperature solder alloy in case of brazing the refrigerant pipes.

en

- When performing brazing work, be sure to ventilate the room sufficiently. Make sure that there are no hazardous or flammable materials nearby. When performing the work in a closed room, small room, or similar location, make sure that there are no refrigerant leaks before performing the work. If refrigerant leaks and accumulates, it may ignite or poisonous gases may be released.
- The appliance shall be stored in a well-ventilated area where the room size corresponds to the room area as specified for operation.
- Keep gas-burning appliances, electric heaters, and other fire sources (ignition sources) away from the location where installation, repair, and other outdoor unit work will be performed.
- If refrigerant comes into contact with a flame, poisonous gases will be released.
- Do not smoke during work and transportation.

1.1. Before installation

⚠ Caution:

- Do not use the unit in an unusual environment. If the outdoor unit is installed in areas exposed to steam, volatile oil (including machine oil), or sulfuric gas, areas exposed to high salt content such as the seaside, or areas where the unit will be covered by snow, the performance can be significantly reduced and the internal parts can be damaged.
- Do not install the unit where combustible gases may leak, be produced, flow, or accumulate. If combustible gas accumulates around the unit, fire or explosion may result.
- The outdoor unit produces condensation during the heating operation. Make sure to provide drainage around the outdoor unit if such condensation is likely to cause damage.

1.2. Before installation (relocation)

⚠ Caution:

- Be extremely careful when transporting or installing the units. Two or more persons are needed to handle the unit, as it weighs 20 kg or more. Do not grasp the packaging bands. Wear protective gloves to remove the unit from the packaging and to move it, as you can injure your hands on the fins or the edge of other parts.
- Be sure to safely dispose of the packaging materials. Packaging materials, such as nails and other metal or wooden parts may cause stabs or other injuries.

1.3. Before electric work

⚠ Caution:

- Be sure to install circuit breakers. If not installed, electric shock may result.
- For the power lines, use standard cables of sufficient capacity. Otherwise, a short circuit, overheating, or fire may result.
- When installing the power lines, do not apply tension to the cables. If the connections are loosened, the cables can snap or break and overheating or fire may result.

- When installing the unit in a hospital or communications office, be prepared for noise and electronic interference. Inverters, home appliances, high-frequency medical equipment, and radio communications equipment can cause the outdoor unit to malfunction or breakdown. The outdoor unit may also affect medical equipment, disturbing medical care, and communications equipment, harming the screen display quality.
- When the unit is running, vibrations or the noise of refrigerant running may be heard from the extension piping. Try to avoid installing the piping to thin walls, etc. as much as possible and provide sound insulation with the piping cover, etc.

1.4. Before starting the test run

⚠ Caution:

- Turn on the main power switch more than 12 hours before starting operation. Starting operation just after turning on the power switch can severely damage the internal parts. Keep the main power switch turned on during the operation season.
- Before starting operation, check that all panels, guards and other protective parts are correctly installed. Rotating, hot, or high voltage parts can cause injuries.

- The base and attachments of the outdoor unit must be periodically checked for looseness, cracks or other damage. If such defects are left uncorrected, the unit may fall down and cause damage or injuries.
- Do not clean the outdoor unit with water. Electric shock may result.

1.5. Using R32 refrigerant outdoor units

⚠ Caution:

- Do not use refrigerant other than R32 refrigerant. If another refrigerant is used, the chlorine will cause the oil to deteriorate.
- Use the following tools specifically designed for use with R32 refrigerant. The following tools are necessary to use R32 refrigerant. Contact your nearest dealer for any questions.

- Be sure to ground the unit. Do not connect the ground wire to gas or water pipes, lightning rods, or telephone grounding lines. If the unit is not properly grounded, electric shock may result.
- Use circuit breakers (ground fault interrupter, isolating switch (+B fuse), and molded case circuit breaker) with the specified capacity. If the circuit breaker capacity is larger than the specified capacity, breakdown or fire may result.

- Do not touch any switch with wet hands. Electric shock may result.
- Do not touch the refrigerant pipes with bare hands during operation. The refrigerant pipes are hot or cold depending on the condition of the flowing refrigerant. If you touch the pipes, burns or frostbite may result.
- After stopping operation, be sure to wait at least five minutes before turning off the main power switch. Otherwise, water leakage or breakdown may result.

- Be sure to use the correct tools. If dust, debris, or moisture enters the refrigerant lines, refrigeration oil deterioration may result.

Tools (for R32)	
Gauge manifold	Flare tool
Charge hose	Size adjustment gauge
Gas leak detector	Vacuum pump adapter
Torque wrench	Electronically refrigerant brazing alloy

2. Installation location

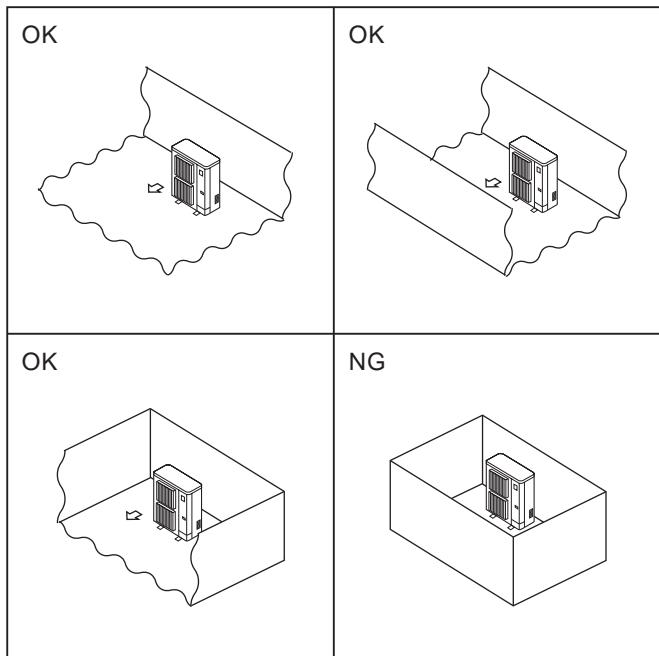

Fig. 2-1

2.1. Choosing the outdoor unit installation location

- ◎ R32 is heavier than air— as well as other refrigerants— tends to accumulate at the base (in the vicinity of the floor). If R32 accumulates around base, it may reach a flammable concentration in case room is small. To avoid ignition, maintaining a safe work environment is required by ensuring appropriate ventilation. If a refrigerant leak is confirmed in a room or an area where there is insufficient ventilation, refrain from using of flames until the work environment can be improved by ensuring appropriate ventilation.
- Avoid locations exposed to direct sunlight or other sources of heat.
- Select a location from which noise emitted by the unit will not inconvenience neighbors.
- Select a location permitting easy wiring and pipe access to the power source and indoor unit.
- Avoid locations where combustible gases may leak, be produced, flow, or accumulate.
- Note that water may drain from the unit during operation.
- Select a level location that can bear the weight and vibration of the unit.
- Avoid locations where the unit can be exposed by snow. In areas where heavy snow fall is anticipated, special precautions such as raising the installation location or installing a hood on the air intake must be taken to prevent the snow from blocking the air intake or blowing directly against it. This can reduce the airflow and a malfunction may result.
- Avoid locations exposed to oil, steam, or sulfuric gas.
- Use the transportation handles of the outdoor unit to transport the unit. If the unit is carried from the bottom, hands or fingers may be pinched.
- ◎ Install all outdoor units in a place where at least one of the four sides is open, and in a sufficiently large space without depressions. (Fig. 2-1)

⚠ Caution:

- Perform grounding.
Do not connect the ground wire to a gas pipe, water pipe arrester or telephone ground wire. Defective grounding could cause an electric shock.
- Do not install the unit in a place where an inflammable gas leaks.
If gas leaks and accumulates in the area surrounding the unit, it could cause an explosion.
- Install a ground leakage breaker depending on the installation place (where it is humid).
If a ground leakage breaker is not installed, it could cause an electric shock.
- Perform the drainage/piping work securely according to the installation manual.
If there is a defect in the drainage/piping work, water could drop from the unit and household goods could be wet and damaged.
- Fasten a flare nut with a torque wrench as specified in this manual.
When fastened too tight, a flare nut may be broken after a long period and cause a leakage of refrigerant.

2.2. Outline dimensions (Outdoor unit) (Fig. 2-2)

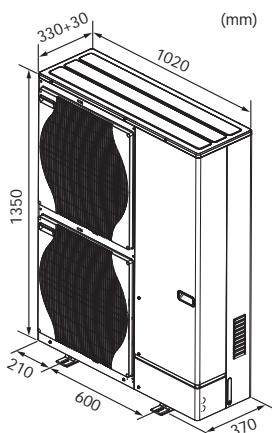

Fig. 2-2

2. Installation location

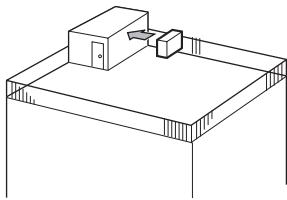

Fig. 2-3

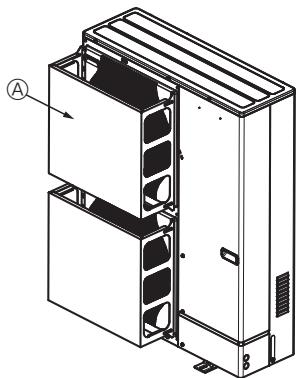

Fig. 2-4

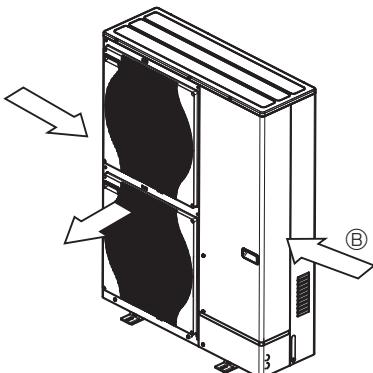

Fig. 2-5

2.3. Ventilation and service space

2.3.1. Windy location installation

When installing the outdoor unit on a rooftop or other location unprotected from the wind, orient the air outlet of the unit so that it is not directly exposed to strong winds. Strong wind entering the air outlet may impede the normal airflow and a malfunction may result.

The following shows three examples of precautions against strong winds:

- ① Face the air outlet towards the nearest available wall about 35 m away from the wall. (Fig. 2-3)
- ② Install an optional air protection guide if the unit is installed in a location where strong winds from a typhoon, etc. may directly enter the air outlet. (Fig. 2-4)
 - Ⓐ Air protection guide
- ③ Position the unit so that the air outlet blows perpendicular to the seasonal wind direction, if possible. (Fig. 2-5)
 - Ⓑ Wind direction

2. Installation location

2.3.2. When installing a single outdoor unit

Minimum dimensions are as follows, except for Max., meaning Maximum dimensions indicated.

Refer to the figures for each case.

- ① Obstacles at rear only (Fig. 2-6)
- ② Obstacles at rear and above only (Fig. 2-7)
 - Do not install the optional air outlet guides for upward airflow.
- ③ Obstacles at rear and sides only (Fig. 2-8)
- ④ Obstacles at front only (Fig. 2-9)
- ⑤ Obstacles at front and rear only (Fig. 2-10)
- ⑥ Obstacles at rear, sides, and above only (Fig. 2-11)
 - Do not install the optional air outlet guides for upward airflow.

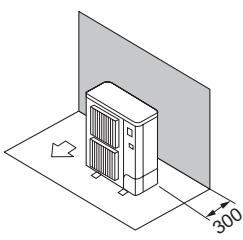

Fig. 2-6

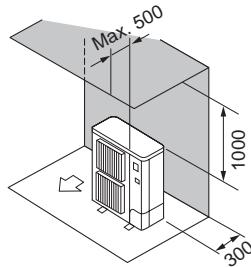

Fig. 2-7

2.3.3. When installing multiple outdoor units

Leave 50 mm space or more between the units

Refer to the figures for each case.

- ① Obstacles at rear only (Fig. 2-12)
- ② Obstacles at rear and above only (Fig. 2-13)
 - No more than 3 units must be installed side by side. In addition, leave space as shown.
 - Do not install the optional air outlet guides for upward airflow.
- ③ Obstacles at front only (Fig. 2-14)
- ④ Obstacles at front and rear only (Fig. 2-15)
- ⑤ Single parallel unit arrangement (Fig. 2-16)
 - * When using an optional air outlet guide installed for upward airflow, the clearance is 500 mm or more.
- ⑥ Multiple parallel unit arrangement (Fig. 2-17)
 - * When using an optional air outlet guide installed for upward airflow, the clearance is 1000 mm or more.
- ⑦ Stacked unit arrangement (Fig. 2-18)
 - The units can be stacked up to two units high.
 - No more than 2 stacked units must be installed side by side. In addition, leave space as shown.

UNIT : mm

2. Installation location

◎ 2.4. Minimum installation area

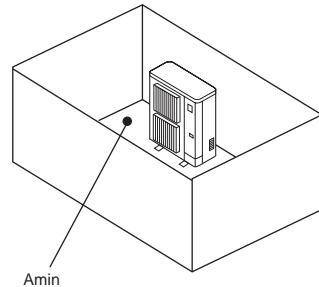

If you unavoidably install a unit in a space where all four sides are blocked or there are depressions, confirm that one of these situations (A, B or C) is satisfied.

Note: These countermeasures are for keeping safety not for specification guarantee.

A) Secure sufficient installation space (minimum installation area Amin).

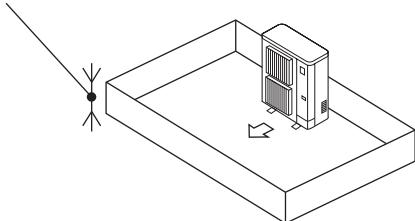

Install in a space with an installation area of Amin or more, corresponding to refrigerant quantity M (factory-charged refrigerant + locally added refrigerant).

M [kg]	Amin [m ²]
1.0	12
1.5	17
2.0	23
2.5	28
3.0	34
3.5	39
4.0	45
4.5	50
5.0	56
5.5	62
6.0	67
6.5	73
7.0	78
7.5	84

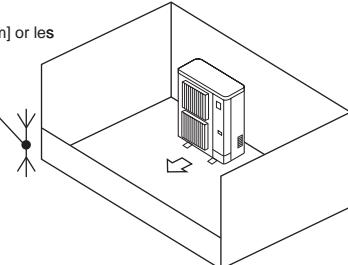

B) Install in a space with a depression height of ≤ 0.125 [m].

Height from the bottom of 0.125 [m] or less

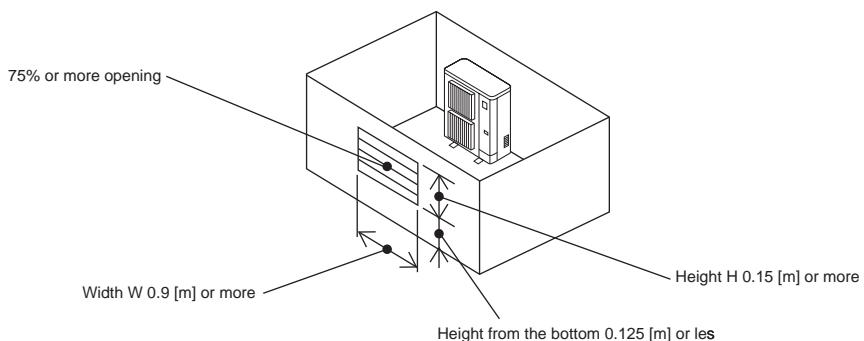

Height from the bottom of 0.125 [m] or less

C) Create an appropriate ventilation open area.

Make sure that the width of the open area is 0.9 [m] or more and the height of the open area is 0.15 [m] or more.

However, the height from the bottom of the installation place to the bottom edge of the open area should be 0.125 [m] or less.
Open area should be 75% or more opening.

3. Installing the outdoor unit

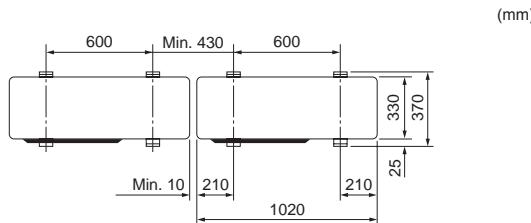

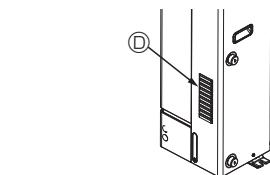

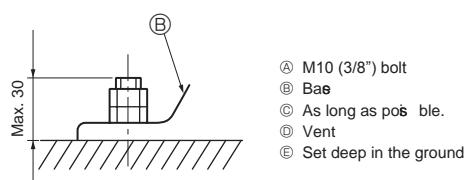

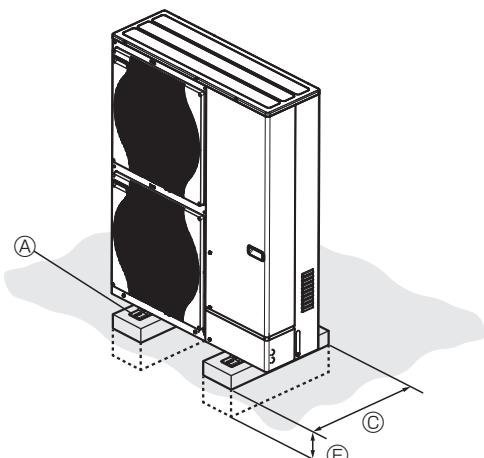

Fig. 3-1

- Be sure to install the unit in a sturdy location to prevent rattling noises during operation. (Fig. 3-1)

<Foundation specifications>

Foundation bolt	M10 (3/8")
Thickness of concrete	120 mm
Length of bolt	70 mm
Weight-bearing capacity	320 kg

- Make sure that the length of the foundation bolt is within 30 mm of the bottom surface of the base.

- Secure the base of the unit firmly with four-M10 foundation bolts in sturdy locations.

Installing the outdoor unit

- Do not block the vent. If the vent is blocked, operation will be hindered and breakdown may result.

- In addition to the unit base, use the installation holes on the back of the unit to attach wires etc., if necessary to install the unit. Use self-tapping screws ($\phi 5 \times 15$ mm or less) and install on site.

⚠ Warning:

- The unit must be securely installed on a structure that can sustain its weight. If the unit is mounted on an unstable structure, it may fall down and cause damage or injuries.
- The unit must be installed according to the instructions in order to minimize the risk of damage from earthquakes, typhoons, or strong winds. An incorrectly installed unit may fall down and cause damage or injuries.

⚠ Caution:

- Install the unit on a rigid structure to prevent excessive operation sound or vibration.

4. Water piping work

4.1. Water piping connection (Fig. 4-1)

- Connect the water pipes to the outlet and inlet pipes (Parallel male screw for 1-inch water pipe (ISO 228/1-G1B))
- Inlet and outlet pipes position is shown on the Fig. 4-1.
- Install the hydraulic filter at the water intake.
- Maximum allowable torque at the water piping connection is 50 N·m.
- Check if water leak after installation.
- Inlet water gauge pressure must be between 0-0.3 MPa.
- Use the inlet water with a temperature lower than 55 °C.

Note:

- The water velocity in pipes should be kept within certain limits of material to avoid erosion, corrosion and excessive noise generation.

Be aware, and take care of, that local velocities in small pipes, bends and similar obstructions can exceed the values above.
e.g.) Copper : 1.5 m/s

- When connecting metal pipes made of different materials, be sure to insulate the joint to prevent electrolytic etching.
- Set up a field system so that the inlet water temperature and water flow rate can be within the allowable range specified in our technical data, etc. If the unit is used out of the allowable range, the parts of unit might be damaged.

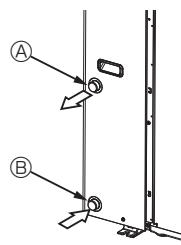

Fig. 4-1

en

Note:

Make sure to perform the frozen prevention measure for water pipe system. (Water piping insulation, back-up pump system, using of a certain % ethylene glycol instead of normal water)

Insulate the water piping properly. The performance can be poor if the insulation is insufficient.

⚠ Warning:

As the outlet water temperature can reach 60 °C at maximum, do not touch the water piping directly with a bare hand.

4.2. Water quality condition

- The water in a system should be clean and with a pH value of 6.5-8.0.

- The following are the maximum values

Calcium : 100 mg/L

Chlorine : 100 mg/L

Iron/manganese : 0.5 mg/L

[Fig. 4-1]

Ⓐ Water outlet

Ⓑ Water inlet

4.3. Minimum water quantity

Refer to the indoor unit installation manual.

4.4. Parts which require regular inspection (Fig. 4-2)

Parts	Check every	Possible failures
Pressure relief valve (3 bar)	1 year (publishing the lever manually)	PRV would be fixed and expansion would burst

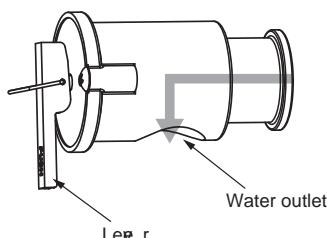

Fig. 4-2

⚠ Caution:

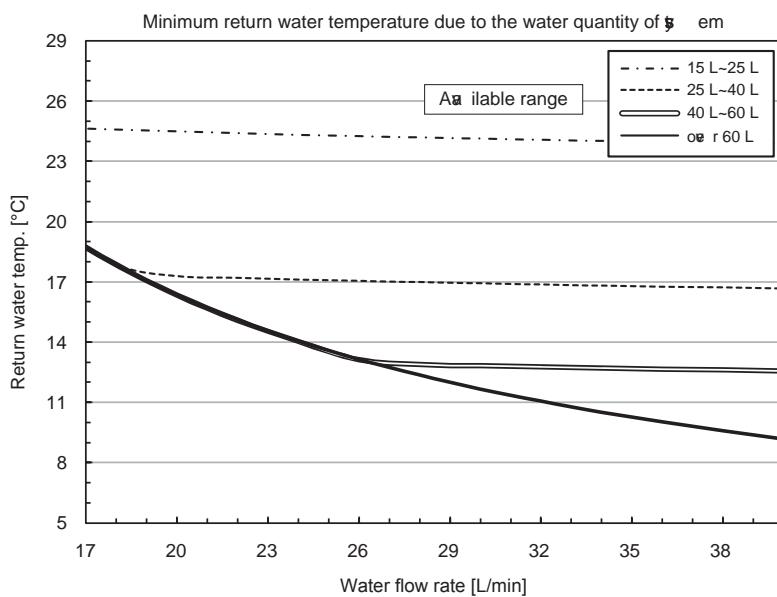

- Operate the lever when the water temperature falls below 40°C.
- Check that the water outlet of the pressure relief valve is facing downward before operating the lever.

If it is not facing downward, rotate the PRV so that it is facing downward.

4. Water piping work

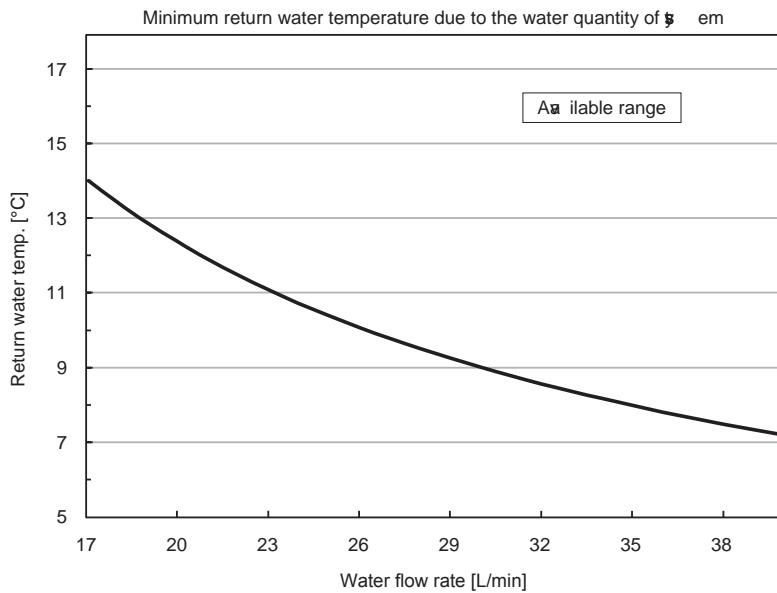

4.5. Available range (Water flow rate, return water temp.)

■ Heating

en

■ Cooling

Note:

Be sure to avoid the unavailable range during defrosting.

Otherwise, the outdoor unit is insufficiently defrosted and/or the heat exchanger of the indoor unit may freeze.

5. Electrical work

5.1. Outdoor unit (Fig. 5-1, Fig. 5-2)

- ① Remove the service panel.
- ② Wire the cables referring to the Fig. 5-1 and the Fig. 5-2.

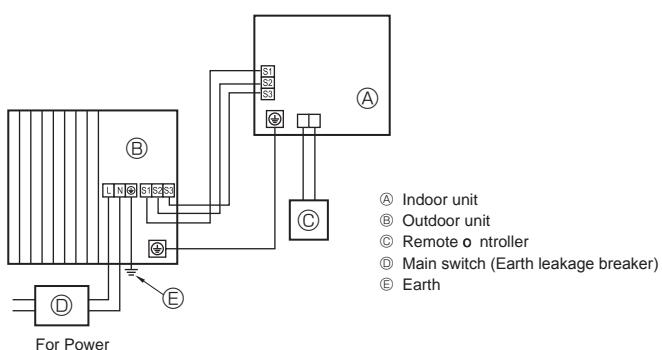

Fig. 5-1

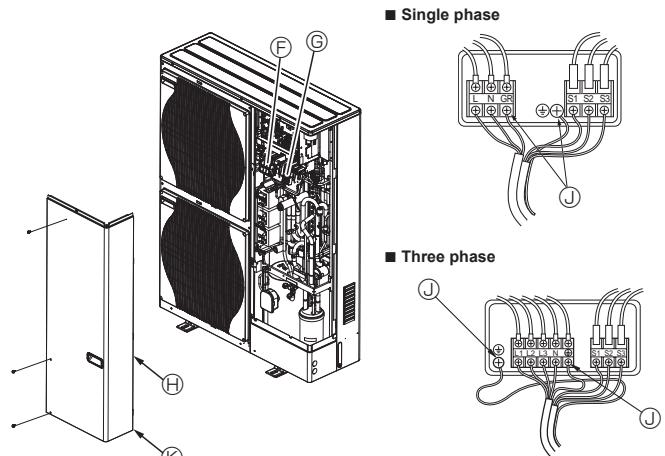

Fig. 5-2

Note :
If the protective sheet for the electrical box is removed during servicing, be sure to reinstall it.

Caution:
Be sure to install N-Line. Without N-Line, it could cause damage to unit.

5. Electrical work

5.2. Field electrical wiring

Outdoor unit model	HWM140V	HWM140Y
Outdoor unit power supply	~N (single), 50 Hz, 230 V	3N~ (3 ph 4-wires), 50 Hz, 400 V
Outdoor unit input capacity Main switch (Breaker)	*1	40 A 16 A
Wiring Wire No. x size (mm ²)	Outdoor unit power supply	3 x Min. 6 5 x Min. 1.5
	Indoor unit-Outdoor unit	3 x 1.5 (Polar) 3 x 1.5 (Polar)
	Indoor unit-Outdoor unit earth	1 x Min. 1.5 1 x Min. 1.5
	Remote controller-Indoor unit	2 x 0.3 (Non-polar) 2 x 0.3 (Non-polar)
Circuit rating	Outdoor unit L-N (single) Outdoor unit L1-N, L2-N, L3-N (3 phase)	230 VAC 230 VAC
	Indoor unit-Outdoor unit S1-S2	230 VAC 230 VAC
	Indoor unit-Outdoor unit S2-S3	24 VDC 24 VDC
	Remote controller-Indoor unit	12 VDC 12 VDC

*1. A breaker with at least 3.0 mm contact separation in each poles shall be provided. Use earth leakage breaker (NV).

Make sure that the current leakage breaker is one compatible with higher harmonics.

Always use a current leakage breaker that is compatible with higher harmonics as this unit is equipped with an inverter.

The use of an inadequate breaker can cause the incorrect operation of inverter.

*2. Max. 45 m

If 2.5 mm² used, Max. 50 m

If 2.5 mm² used and S3 separated, Max. 80 m

*3. The 10 m wire is attached in the remote controller assembly.

*4. The figures are NOT always against the ground.

S3 terminal has 24 VDC against S2 terminal. However between S3 and S1, these terminals are NOT electrically insulated by the transformer or other device.

*5. In multi-phase appliance the color of the neutral conductor or the supply cord, if any, shall be blue.

Notes: 1. Wiring size must comply with the applicable local and national codes.

2. Power supply cables and the cables between Interface unit/Flow temp. controller and outdoor unit shall not be lighter than polychloroprene sheathed flexible cables. (Design 60245 IEC 57)

3. Be sure to connect the cables between Interface unit/Flow temp. controller and outdoor unit directly to the units (no intermediate connections are allowed).

Intermediate connections may result in communication errors. If water enters at the intermediate connection point, it may cause insufficient insulation to ground or a poor electrical contact.

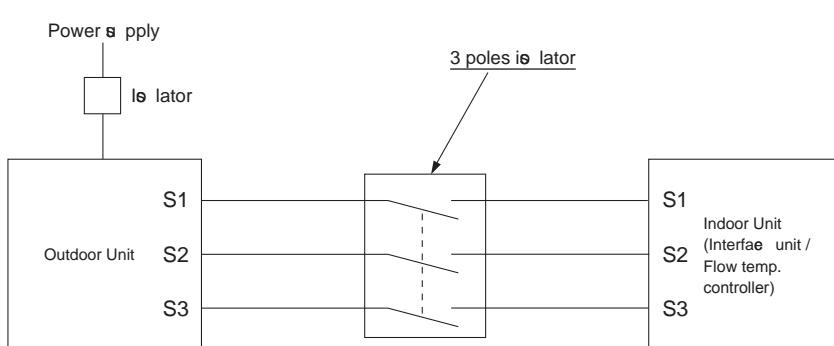

(If an intermediate connection is necessary, be sure to take measures to prevent water from entering the cables.)

4. Install an earth longer than other cables.

5. Do not construct a system with a power supply that is turned ON and OFF frequently.

6. Use self-extinguishing distribution cables for power supply wiring.

7. Properly route wiring so as not to contact the sheet metal edge or a screw tip.

⚠ Warning:

- In case of A-control wiring, there is high voltage potential on the S3 terminal caused by electrical circuit design that has no electrical insulation between power line and communication signal line. Therefore, please turn off the main power supply when servicing. And do not touch the S1, S2, S3 terminals when the power is energized. If isolator should be used between indoor unit and outdoor unit, please use 3-pole type.

Never splice the power cable or the indoor-outdoor connection cable, otherwise it may result in a smoke, a fire or communication failure.

6. System control

Set the refrigerant address using the DIP switch of the outdoor unit.

SW1 Function Setting

SW1 Setting	Refrigerant address
ON OFF 	00
ON OFF 	01
ON OFF 	02

SW1 Setting	Refrigerant address
ON OFF 	03
ON OFF 	04
ON OFF 	05

Note:

- a) Up to 6 units can be connected.
- b) Select one single model for all units.
- c) For Dip switch setting for indoor unit, refer to the indoor unit's installation manual.

en

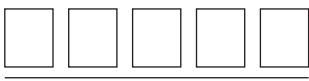

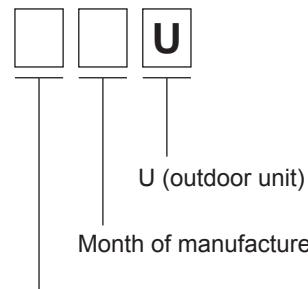

7. Specifications

Outdoor model	PUZ-HWM140VHA	PUZ-HWM140YHA
Power supply	V / Phase / Hz	230 / Single / 50
Dimensions (W × H × D)	mm	1020 × 1350 × 330
Sound Power Level *1 (Heating)	dB(A)	67

*1 Measured under rated operation frequency

8. Serial number

■ The serial number is indicated on the SPEC NAME PLATE.

Sequential number for each unit: 00001–99999

Month of manufacture: 4, 5, 6, 7, 8, 9, X (10), Y (11), Z (12), 1, 2, 3

Year of manufacture (western calendar) : 2020 → 0, 2021 → 1

MITSUBISHI ELECTRIC AIR CONDITIONING SYSTEMS EUROPE LTD.
NETTLEHILL ROAD, HOUSTOUN INDUSTRIAL ESTATE, LIVINGSTON, EH54 5EQ, SCOTLAND, UNITED KINGDOM

hereby declares under its sole responsibility that the air conditioners and heat pumps described below for use in residential, commercial and light-industrial environments:
erklärt hiermit auf seine alleinige Verantwortung, dass die Klimaanlagen und Wärmepumpen für das häusliche, kommerzielle und leicht-industrielle Umfeld wie unten beschrieben:
déclare par la présente et sous sa propre responsabilité que les climatiseurs et les pompes à chaleur décrits ci-dessous, destinés à un usage dans des environnements résidentiels, commerciaux et d'industrie légère :

verklaart hierbij onder eigen verantwoordelijkheid dat de voor residentiële, commerciële en licht-industriële omgevingen bestemde airconditioners en warmtepompen zoals onderstaand beschreven:

por la presente declara bajo su única responsabilidad que los acondicionadores de aire y bombas de calor descritas a continuación para su uso en entornos residenciales, comerciales y de industria ligera:

conferma con la presente, sotto la sua esclusiva responsabilità, che i condizionatori d'aria e le pompe di calore descritti di seguito e destinati all'utilizzo in ambienti residenziali, commerciali e semi-industriali:

με το παρόν πιστοποιεί με αποκλειστική της ευθύνη ότι οι τα κλιματιστικά και οι αντίλεις θέρμανσης που περιγράφονται παρακάτω για χρήση σε οικιακό, επαγγελματικό και ελαφριάς βιομηχανίας περιβάλλοντα:

através da presente declara sob sua única responsabilidade que os aparelhos de ar condicionado e bombas de calor abaixo descritos para uso residencial, comercial e de indústria ligeira:
erk ærter hermed under eneana r, at de herunder beskrivne og erklærede varemærke til brug i private boliger, erke re mærker og inden for let indus ri:

intg ar härmed att luftvärmeuttagarna ob ä mepumparna s m bér is nedan för att använda i bol äder, m mmera alla miljöer ob lättad indus riella miljöer:

erk ærter et fulls endig angivelse for undernevn te kimaanlegg og mepumpere d bruk i boliger, a m t b mmera elle og lettindus rielle miljöer:

a k uttaa täten k nomaie lla a s uullaan, että jäälämpänä k a tut as inraab nnub in, pienteolis u s y töön ja a upallie en k y töön tarb itetut ulb k k tja lämpöpumput:

tímtó a vlastní odpovědnost prohlášuje, že níže popsané klimatické jednotky a tepelná čerpadla pro použití v obytných prostředích, komerčních prostředích a prostředich lehkého průmyslu:

niniejszym oświadcza na swoją wyjątkową odpowiedzialność, że klimatyzatory i pompę ciepła opisane ponizej, są przeznaczone do zastosowania w środowisku mieszkalnym, handlowym i lekkim przemysłowym:

deklapira na svoja odgovornost, che klimatizacite i termopompe, opisani po-dolu, za upotrebu v žiliščih, tvořivski i neki promišljeni uslovia:

týmo na svoju vylučnu odgovodnost vyhlásuje, že nasedlovné klimatické jednotky a tepelné čerpadlá určené na používanie v obytných a obchodných priestoroch a v prostredí ľahkého priemyslu:

aujdirot kizárlat felelősséggére nyilatkozik, hogy az alábbi lakossági, kereskedelmi és kispári környezetben való használatra szánt klimaberendezések és hőszivattyúk:

izjavljuje pod izključno lastni odgovornostjo, da so spodaj navedene klimatske naprave in toplotne črpalki, namenjene uporabi v stanovanjskih, komercialnih in lahkoindustrijskih okoljih:

declară, prin prezența, pe proprie răspundere, faptul că aparatelor de climatizare și pompele de căldură descrise mai jos și destinate utilizării în medii rezidențiale, comerciale și din industria ușoară:

kinnítik káesolevág oma ainuvastutuse sel, et allpool toodud klimateadmed ja soojuspumbad on mõeldud kasutamiseks elu-, äri- ja kergtööstuskeskuskondades:

ar ſo, vienpersoniski uzņemties atbildibū, paziņo, ka tālāk aprakstītie gaisa kondicionētāji un siltumsūknī parezētā lietošanai dzīvojamajās, komercdarbības un vieglās rūpniecības telpās.

šiuo vien tik savo atskakomybe pārēķina, kad toliai apibūdinti oro kondicioneierai ir šilumos siurbilia skirti naudoti gyvenamosiose, komercinēse ir lengvosios pramones aplinkose:

ovime izjavljuje pod isključivom odgovornošću da su klimatizacijski uređaji i toplosne pumpe opisane u nastavku namijenjeni za upotrebu u stambenim i poslovnim okruženjima te okruženjima lake indus rije:

ovim izjavljuje na svoju isključivu odgovornost da su klima-uredaji i toplosne pumpe opisane u daljem tekstu za upotrebu u stambenim, komercijalnim okruženjima i okruženjima sa lakov industrijom:

MITSUBISHI ELECTRIC, PUZ-HWM140VHA*, PUZ-HWM140YHA*

Note: Its serial number is on the nameplate of the product.

Hinweis: Die Seriennummer befindet sich auf dem Kennschild des Produkts.

Remarque : Le numéro de série de l'appareil se trouve sur la plaque du produit.

Opmerk ng: het serie nummer is aan op het naamplaatje a n het produkt .

Nota: El número de serie se encuentra en la placa que contiene el nombre del producto.

Nota: il numero di serie è trovato alla targhetta del prodotto.

Σημείωση: Ο σειριακός του αριθμός βρίσκεται στην πινακίδα ονόματος του προϊόντος.

Nota: o número de série encontra-se na placa que contém o nome do produto.

Bemerk Seriennummeret s är på produkts fabrikat.

Obs: Serienumret finns på produkten namnplåt.

Merk: Serienummet befinner seg på navneplaten til produktet.

Huomautus: Sarjanumero on merkityt laitteessa a k lpeen.

Tomoyuki Miwa
Manager, Quality Assurance Department

<ENGLISH>

English is original. The other languages versions are translation of the original.

▲ CAUTION

- Refrigerant leakage may cause suffocation. Provide ventilation in accordance with EN378-1.
- Be sure to wrap insulation around the piping. Direct contact with the bare piping may result in burns or frost bite.
- Never put batteries in your mouth for any reason to avoid dental ingestion.
- Battery ingestion may be dangerous and/or poisonous.
- Install all the unit on a rigid structure to prevent noise and vibration.
- The A-weighted sound pressure level is below 70dB.
- This appliance is intended to be used by expert or trained users in workshops in light industry and on farms or for commercial use by lay persons.

<DEUTSCH>

Das Original ist in Englisch. Die anderen Sprachversionen sind vom Original übersetzt.

▲ VORSICHT

- Wenn Kältemittel austreift, kann dies zu Erstickung führen. Sorgen Sie in Übereinstimmung mit EN378-1 für Durchlüftung.
- Die Leitungen müssen isoliert werden. Direkter Kontakt mit nicht isolierten Leitungen kann zu Verbrennungen oder Erfrierungen führen.
- Nehmen Sie niemals Batterien in den Mund, um ein versehentliches Verschlucken zu vermeiden.
- Durch das Verschlucken von Batterien kann es zu Erstickungen und/oder Vergiftungen kommen.
- Installieren Sie das Gerät auf einem stabilen Untergrund, um übermäßige Betriebsgeräusche oder -schwingungen zu vermeiden.
- Der A-gewichtete Schalldruckpegel ist niedriger als 70dB.
- Dieses Gerät ist vorgesehen für die Nutzung durch Fachleute oder geschultes Personal in Werkstätten, in der Leichtindustrie und in landwirtschaftlichen Betrieben oder für die kommerzielle Nutzung durch Laien.

<FRANÇAIS>

L'anglais est l'original. Les versions fournies dans d'autres langues sont des traductions de l'original.

▲ PRECAUTION

- Une fuite de réfrigérant peut entraîner une asphyxie. Fournissez une ventilation adéquate en accord avec la norme EN378-1.
- Assurez-vous que la tuyauterie est enveloppée d'isolant. Un contact direct avec la tuyauterie ne peut entraîner des brûlures ou des engelures.
- Ne mettez jamais des piles dans la bouche pour quelque raison que ce soit pour éviter de les avaler par accident.
- Le fait d'ingérer des piles peut entraîner un étouffement et/ou un empoisonnement.
- Installez l'appareil sur une structure rigide pour prévenir un bruit de fonctionnement et une vibration excessifs.
- Le niveau de pression acoustique pondéré est en dessous de 70 dB.
- Cet appareil est conçu pour un utilisateur expert ou les utilisateurs formés en magasin, dans l'industrie légère et dans l'agriculture ou dans le commerce par le profane.

<NEDERLANDS>

Het Engels is het origineel. De andere taalversies zijn vertalingen van het origineel.

▲ VOORZICHTIG

- Het lekkage van de koelvloeistof kan tot asfyxiëring leiden. Zorg voor ventilatie in overeenstemming met EN378-1.
- Leer de leidingen met isolatiemateriaal. Direct contact met de onbedekte leidingen kan tot brandwonden of bevrorenen leiden.
- Stop nooit batterijen in uw mond om beschadiging te voorkomen.
- Het inslikken van batterijen kan tot asfyxiëring en vergiftiging leiden.
- Installeer het apparaat op een stabiele structuur om overmatig lawaai of trillingen te voorkomen.
- Het niveau van de geluidsdruk ligt onder 70 dB(A).
- Dit apparaat is bedoeld voor gebruik door ervaren of geptelearde gebruikers in werkplaatsen, in de industrie en in de landbouw of voor commerciële gebruik door leden.

<ESPAÑOL>

El idioma original del documento es el inglés. Las versiones en los demás idiomas son traducciones del original.

▲ CUIDADO

- Las pérdidas de refrigerante pueden causar asfixia. Se debe proporcionar la ventilación de acuerdo con la norma EN378-1.
- Asegúrese de colocar el aislante alrededor de las tuberías. El contacto directo con la tubería puede causar quemaduras o congelación.
- Para evitar una ingestión accidental, no coloque las pilas en su boca bajo ningún concepto.
- La ingestión de las pilas puede causar asfixia y/o envenenamiento.
- Coloque la unidad en una estructura rígida para evitar que se produzcan sonidos o vibraciones excesivas debidas a su funcionamiento.
- El nivel de presión acústica ponderada A es inferior a 70 dB.
- Este aparato es destinado a ser usado por parte de usuarios expertos o profesionales en talleres industriales ligeros y granjas o a ser usado por mercados por parte de personas no expertas.

<ITALIANO>

Il testo originale è redatto in lingua Inglese. Le altre versioni linguistiche rappresentano traduzioni dell'originale.

▲ ATTENZIONE

- Le perdite di refrigerante possono causare asfissia. Prevedere una ventilazione adeguata in conformità con la norma EN378-1.
- Avere cura di applicare la materiali isolanti intorno alle tubature. Il contatto diretto con le tubazioni non deve essere possibile proprio per i denti o per il gelo.
- Non introdurre in bocca alcuna delle batterie in modo da evitare ingerimenti accidentali.
- Evitare che le pile inghiottite causino asfissia e/o avvelenamento.
- Installare l'unità su una struttura rigida in modo da evitare rumore e vibrazioni.
- Il livello di pressione acustica ponderata A è inferiore a 70dB.
- Questo apparecchio è destinato a essere utilizzato da parte di utenti esperti o addetti rati in negozio, industria leggera o fattorie oppure a un uso commerciale da parte di persone non esperte.

<ΕΛΛΗΝΙΚΑ>

Η γλώσσα του πρωτότυπου είναι η αγγλική. Οι εκδόσεις άλλων γλωσσών είναι μεταφράσεις του πρωτότυπου.

▲ ΠΡΟΣΟΧΗ

- Η διαρροή του ψυκτικού ενδέχεται να προκαλέσει ασφυξία. Φροντίστε για τον εξερεισμό σύμφωνα με το πρότυπο EN378-1.
- Φροντίστε να τηλέσετε με μονωτικό υλικό τη σωλήνωση. Η απευθείας επαφή με τη γυμνή σωλήνωση ενδέχεται να προκαλέσει εγκαύματα ή κρυοπαγήματα.
- Μη βάζετε ποτέ τις μπαταρίες στο στόμα σας για κανένα λόγο ώστε να αποφύγετε την κατά λάθος κατάπτωση τους.
- Η κατάπτωση μπαταριών μπορεί να προκαλέσει πτωμάτων ή/και δηλητηρίαση.
- Εγκαταστήστε τη μονάδα στη σταθερή κατασκευή ώστε να αποφύγετε τον έντονο ήχο λειτουργίας της τους κραδασμών.
- Η Α-σταθμισμένη στάθμη ηχητικής πίεσης είναι κάτια των 70dB.
- Η αυστηρή απορρίψη για χρήση από έμπειρους ή εκπαιδευμένους χρήστες σε καταστήματα, στην ελαφριά βιομηχανία και σε αγροκήπατα, ή για έμποροκή χρήση από άτομα τα οποία δεν είναι ειδικούς.

<PORTUGUÊS>

O idioma original é o inglês. As versões em outros idiomas são traduções do idioma original.

▲ CUIDADO

- A fuga de refrigerante pode causar asfixia. Garanta a ventilação em conformidade com a norma EN378-1.
- Certifique-se de que envolve as tubagens com material de isolamento. O contacto directo com tubagens não isoladas pode resultar em queimaduras ou ulcerações provocadas pelo frio.
- Nunca coloque pilhas na boca, por nenhum motivo, para evitar a ingestão acidental.
- A ingestão de uma pilha pode causar obstrução das vias respiratórias e/ou envenenamento.
- Instale a unidade numa estrutura robusta, de forma a evitar ruídos ou vibrações excessivos durante o funcionamento.
- O nível de pressão sonora ponderada A é inferior a 70 dB.
- Este equipamento destina-se a ser utilizado por especialistas ou utilizadores com formação em lojas, na indústria leiga e em quintas, ou para utilização comercial por leigos.

<DANSK>

Engels er originalen. De andre prøver er også oversat til originalen.

▲ FORSIGTIG

- Læs godt af isoleringen på rørne inden i er liring. Sørg for udluftning i ørrentemmel med EN378-1.
- Sørg for at påtak med ubekædte rør i forårsagelse af forbrændinger eller forfrydinger.
- Batterier må under ingen omstændigheder tages i munden for at forhindre utilsigtet indtagelse.
- Indtagelse af batterier i forårsagelse af liring og/eller forgiftning.
- Indtagelsen af batterier i forårsagelse af høj driftsdrift og/eller vibrationer.
- Det A-vægtede lydtrykknivniveau er under 70dB.
- Dette apparat er beregnet til at blive brugt af eksperter eller udærlige brugere i bilen, inden for let industri og på gårde eller til kommerciel anvendelse af lægmænd.

<SVENSKA>

Engelska är originalspråket. De övriga språkversionerna är översättningar av originalalet.

▲ FÖRSIKTIGHET

- Köldmeddels åtgärda ledar till risk för sviktning. Tillhandahåll ventilation i enlighet med EN378-1.
- Kom ihåg att linda isolering runt rören. Direkt kontakt med bara rör i ledar till bränningar eller förfrystningar.
- Stopp aldrig batterier i munnen, de är inte tillåtna av myndigheten.
- Om ett batteri åt sig in i det ledar till risk för obefrielse eller förgiftning.
- Montera enheten på ett sätt att undgå att förhindra höga driftsljud och vibrationer.
- Den A-vägde lydtrycksnivån är under 70dB.
- Denna apparat är ämnad för användning av experter eller utbildade användare i affärer, inom lätt industri och på lantbruk eller för kommerciell användning av tekniker.

<NORSK>

Originalspråket er engelsk. De andre språkversjonene er oversettelser av originalen.

▲ FORSIKTIG

- Kjølemeddels åtgærder kan føre til kvelning. Sørg for ventilering i samsvar med EN378-1.
- Pas godt på isoleringen på rørene. Det er ikke godt rundt røret. Direkt kontakt med ukedte rør i ledet til brannhendelse eller forfrysning.
- Aldri plasser batterier i munnen, da dette ikke er medført en risiko for at du kan iver batteriet ved et uhell.
- Hvis du spiser et batteri, ikke du risikere at få liring og/eller forgiftning.
- Installer enheten på en stabil struktur for å forhindre unødvendig mye driftsstøy eller vibrering.
- Det A-vegde lydtrykknivniveauet er under 70 dB.
- Dette apparatet er ment for bruk av eksperter eller faglært personell i bilen, lettindustri og på gårder, eller for kommersielt bruk av ikke-fagmenn.

<SUOMI>

Englanninkielinen asiakirja on alkuperäinen. Muunkieliset versiot ovat alkuperäisen käännytyksiä.

▲ HUOMIO

- Kylmäaineenvuoto voi aiheuttaa tukehtumisen. Järjestää tuuletuksen standardin EN378-1 mukaisesti.
- Putkis o pitää erittäin. Suora putki paljaa en putoa vesi aiheuttaa palovaamman tai paleltuman.
- Älä koskaan laita paristoja suuhun mistään syystä, jotta vältät tahattoman nielemisen.
- Paris on nielemisen ja aiheuttaa tulen haittaa myös kynnyksellä.
- Älä nauta tulen ja tulen näteet en eikä läihilleen, toiminnaat aiheuttamaan, äänien tai tärinän.
- A-painotettu äänenvaihtelasto on alle 70 dB.
- Tämä laite on tarjottu antutijoiden tai tulutettujen lähetäjien ja liikehuoneisiin, eikä ne ole teollisuuden tiloissa ja maatalolla tai maailmille jen upalliseen ja töön.

<ČEŠTINA>

Originál je v angličtině. Ostatní jazykové verze jsou překladem originálu.

▲ POZOR

- Únik chladidloho média môže zpôsobiť udusenie. Zajistite vetranie v souladu s normou EN 378-1.
- Putribu omotajte izolaciu. Prímý kontakt s obnaženým potrubím môže zpôsobiť popálenie alebo omrzlinu.
- Nikdy si z žádného dôvodu nevkládejte baterie do úst, aby nedošlo k jejich polknutiu.
- Polknutá batéria môže zpôsobiť dusenie alebo otravu.
- Jednotku nainštalačte na pevnou konštrukciu, aby nedochádzalo ke vzniku nadmerného prevozného tlaku a vibrácií.
- Hladina akustického tlaku je nižšia než 70 dB.
- Toto zařízení je určeno pro profesionální, lehký průmysl a farmy, kde je musí obsluhovat odborníci a školní užívatele, a pro komerční použití, kde je mohou obsluhovat laici.

<POLSKI>

Językiem oryginału jest język angielski. Inne wersje językowe stanowią tłumaczenia oryginału.

▲ UWAGA

- Wyciek czynnika chłodniczego może spowodować uduszenie. Należy zapewnić wentylację zgodnie z normą EN378-1.
- Należy pamiętać, aby owinąć izolację wokół przewodów rurowych. Bezpośredni kontakt z niezabezpieczonymi przewodami rurowymi może doprowadzić do poparzeń lub odmrożeń.
- Nie wolno wkładać baterii do ust z jakiegokolwiek powodu, aby uniknąć przypadkowego polknutia.
- Poknute baterie mogą spowodować zadławienie i/lub zatrucie.
- Zainstalować urządzenie na sztywnej konstrukcji, aby zapobiec nadmierному hałasowi i vibracjom.
- Poziom dźwięku A nie przekracza 70 dB.
- W sklepach, w przemyśle lekkim i w gospodarstwach rolnych urządzenie powinno obsługiwać profesjonalistów lub przeszkołony użytkownicy, a w środowisku handlowym mogą to być osoby nieposiadające fachowej wiedzy.

This product is designed and intended for use in the residential, commercial and light-industrial environment.
