

Technical Bulletin

Number	059
Subject	Hitachi Serial Number Identification
Date	Friday, 03 December 2010

Aged Hitachi Set Free models FS3 and FSG Series have two potential electric and inverter sets. This is entirely dependent on the serial number.

Failure to identify the correct serial number can result in the wrong spares being issued and pricing discrepancies. If you are unsure of the serial no, **please look at the below pictures & advise us which diode module is currently fitted to the a/c unit as this will allow Logicool to identify the correct components.**

RAS 5 FS3/FSG & RAS 8 to 20FS3 / FSG

Before Serial No. U4MV0196 & U4NG1002

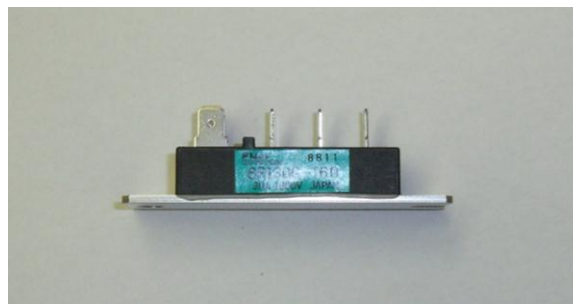

Diode module has screw terminals

RAS 5 FS3/FSG & RAS 8 to 20FS3 / FSG

After Serial No. U4MV0196 & U4NG1002

Diode model has push on terminals

Other components that are dependent on the serial no. are the inverter PCB (PCB 3), Power Transistor Module, Z3 Surge Absorber & the PCB 1.
