Panasonic condensing units with natural refrigerant -Warehouses / Industry

Panasonic condensing units with natural refrigerant – Warehouses / Industry

A peace of mind with refrigeration systems for warehouses and industries.

 $\rm CO_2$ is non-toxic refrigerant. It means products has no contamination risk as well as safety working environment. Independent refrigeration system is the safe and resilient installation.

heating & cooling solutions

The benefits of CO₂

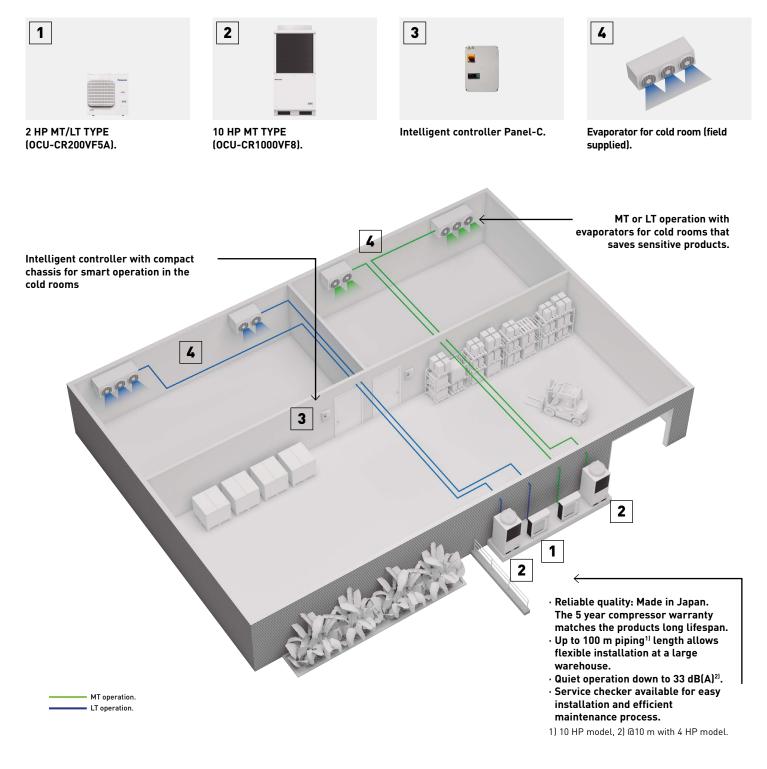

CO₂ refrigerant = Natural refrigerant = Sustainable solution. CO₂ is a future-proof solution in refrigeration, because it is not impacted by any current legal restriction, nor quota, taxes, strong price increases or shortage.

With its CO₂ refrigeration systems, Panasonic provides a solution in Europe which helps prevent global warming and supports environmentally-friendly and cost saving retail operations.

- · CO₂ is an environmentally-friendly solution, with a zero ODP (Ozone Depletion Potential) and a GWP (Global Warming Potential) = 1
- \cdot No Quota, no shortage, no obsolescence
- \cdot $\mathrm{CO}_{_{2}}$ will not be affected by future legal evolutions and bans
- \cdot European subsidies can be applied for better ROI
- \cdot CO₂ meets the latest F-gas regulation and Eco-design efficiency requirements

A sustainable refrigeration system for your warehouse

Panasonic professionals strongly support your projects to meet customers' requests!

CO₂ (R744) is the choice of the refrigerant to curb the carbon footprint of any business organisation, especially owners of restaurants to whom it brings key advantages.

Highly flexible & resilient CO, condensing units

Maximum 10HP capacity and up to 100m piping length deliver high flexibility in order to satisfy entire needs of warehouses / Medium & Low temperature operation possibilities adapt the several needs of different cold rooms. Independent refrigeration systems secure the safety in the case any breakdown happens.

Fresh food without any contamination risk

CO₂ is a non-toxic refrigerant. There is no risk of food contamination in the case of a leakage inside cold rooms.

Safety first

As a non-toxic and non-flammable refrigerant, CO₂ ensures high levels of safety from commissioning to maintenance.

Remote monitoring to secure your business

Panasonic is compatible with major monitoring systems, such as Carel, Danfoss, Dixell, Eliwell and RDM.

Case studies

Beyond the environmentally friendly aspects of the natural refrigerant CO2, Panasonic's CR series was also selected for its high seasonal efficiency, product quality and reliability. The series offers unique advantages by allowing easy switching between medium temperature and low temperature operation.

Riverford Organic Farmers. Country: UK. Units: 4 x 1000VF8A.

Factors of success:

1 Minimizing the impact of refrigerant gas leakage on carbon emissions and achieves new levels of energy efficiency in line with the company's sustainability aims.

- 2 The total energy savings at the butchery is at least 50%, compared to a standard
 - refrigeration system using R452A as a refrigerant.

Mushroom storage facility. Country: France. Units: 14 x 1000VF8A.

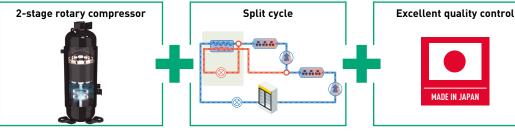

Factors of success:

- 1 Independent refrigeration systems are safer and resilient installation with a backup.
- 2 Quiet sound experience by Panasonic CO, technologies.
- 3 Easy commissioning, plug-andplay approach.
- 4 Centralized monitoring and supervision.

High performance and reliable quality by Panasonic

All condensing units have been subjected to strict quality controls to meet high-quality expectations. The excellent performance of the CR series condensing units is the result of the combination of superior Panasonic technology and over 20 years of experience with CO₂ refrigerant!

- · Unique Panasonic 2-stage rotary compressor with more than 20 years experience
- · 5 year compressor warranty
